Amount of Keywords in Top Search Results

You show up in the top 50 search results on Google for 274 different keywords. The largest portion of those are not on the first page, and that represents a huge amount of potential of over 35k clicks per month. That is comparable to \$40k in equivalent Adwords dollars.

Number of Unique Pages that Rank Organically

159 of your pages appear in the top 50 of at least one search.

Total Organic Clicks Per Month

You should be getting 2k clicks per month from your organic placements on Google. That's up 2k clicks or 1k% from last month.

Value of Organic Clicks Per Month

If you had to buy all those organic clicks via Google Adwords, they'd cost \$1k. That's an additional savings of \$1k over last month.

You gained 1,936 clicks last month, worth \$1,422.

Biggest Gains

You moved up in ranks on 133 keywords last month. All those gains added up to about 129 clicks you wouldn't have received last month. In equivalent PPC dollars, all those new clicks are worth about \$173.

Keywords Not Ranked On But Should Be

You and your competitors often show up in the same search results -- that's why they are competitors. But, sometimes they are showing up and you are not. Right now, there are about 480 searches per month where you are not contesting your competitors. Look at the keywords, and decide whether it makes sense to counter them.

Keyword Overlap in Your SEO & PPC campaigns

You currently don't have any ads on keywords that you also rank organically for. *This means that you aren't spending any money on ads when you have a search result. However, surprisingly enough, it is sometimes profitable to do so since that ad will probably have a good quality score.*
