Amount of Keywords in Top Search Results

You show up in the top 50 search results on Google for 34 different keywords. The largest portion of those are not on the first page, and that represents a huge amount of potential of over 3k clicks per month. That is comparable to \$2k in equivalent Adwords dollars.

Number of Unique Pages that Rank Organically

22 of your pages appear in the top 50 of at least one search. That's 4 more pages on your site showing up in searches this month than last month.

Total Organic Clicks Per Month

You should be getting 100 clicks per month from your organic placements on Google. That's up 96 clicks or 2k% over the past quarter.

Value of Organic Clicks Per Month

If you had to buy all those organic clicks via Google Adwords, they'd cost \$17. And that's taking into account the conversion rate bump you get when you can choose your landing page

You gained 89 clicks last month, worth \$31.

Biggest Gains

You moved up in ranks on 25 keywords last month. All those gains added up to about 98 clicks you wouldn't have received otherwise. In equivalent PPC dollars, all those new clicks are worth about \$4.72.

Keyword Overlap in Your SEO & PPC campaigns

You currently don't have any ads on keywords that you also rank organically for. This means that you aren't spending any money on ads when you have a search result. However, surprisingly enough, it is sometimes profitable to do so since that ad will probably have a good quality score.
