Top Keyword Recommendations

We’ve sifted through all the ads your competitors have ever bought, 13k in all, looking for patterns. By digging through your competitors’ historical bidding record, we can see which keywords are their most successful.

Next, we figure out which keyword match type (phrase, broad, exact, modified broad) your competitors are buying and we filter out any that you already buy. When a keyword is large enough that we think it belongs in its own ad group we dig deeper to discover the best performing ad copy to give you a place to get started.

These are the top 50 keyword recommendations for you to add to your campaign. Combined, these recommendations represent 4k new clicks per month for your campaign.

Best Negative Match Opportunities

Sometimes our best recommendations are to avoid certain keywords with little or no return. There are no results in this section, though, because we haven’t seen enough of your ads to tell if you have any waste.

Once we do, we can determine the industry you’re competing in, as well as the keywords your competitors avoid already.

As we see more of your ads in the future, we can share advice that guards against wasteful clicks or customers who can’t find what they are looking for.
