Top Keyword Recommendations

We've sifted through all the ads your competitors have ever bought, 57k in all, looking for patterns. By digging through your competitors' historical bidding record, we can see which keywords are their most successful.

These charts show the combined coverage of your competitors on the keyword over the last 14 months. Each color represents a single competitor, each column is a month. Graphs going up and to the right mean your competitors are betting more on a keyword over time.

Next, we figure out which keyword match type (phrase, broad, exact, modified broad) your competitors are buying and we filter out any that you already buy. When a keyword is large enough that we think it belongs in its own ad group we dig deeper to discover the best performing ad copy to give you a place to get started.

These are the top 50 keyword recommendations for you to add to your campaign. Combined, these recommendations represent 4k new clicks per month for your campaign.

**Best Negative Match Opportunities**

Trim the fat from your campaign by excluding these specific keywords. Avoiding low-quality matches like these improves your conversion rate and protects you from wasteful clicks that drain your budget.

We can also say with confidence these keywords are neither profitable nor popular with your competitors.

While broad match might be the culprit, there is no question that your ad shows up when we run these searches. We included a snapshot of the ad and the results page to help you weed out these matches. If you are not buying these keywords directly, you might want to "negative match" these keywords in Adwords or restructure your match types on more targeted keywords.
